0.1 INTRODUCTION

Business Problem : " Which locality in the USA would be best for opening a Cafe "

We are looking to open a gaming cafe in the USA and need data on the following: Population Density, Per Capita Income, Population of each location and Venues in each locality

We will use the following sources to analyse this data: List of all the cities in United States with population density and coordinates:
https://en.wikipedia.org/wiki/List_of_United_States_cities_by_population

List of all the cities in United States with Per Capita Income :
https://en.wikipedia.org/wiki/List_of_United_States_counties_by_per_capita_income

We will also use Four Square API to get data on: List of venues for each city and List of venues in each locality for selected city

[]:
